Title: **UNIVERSAL PORTABLE ILLUMINATED ARTWORK MODULE**

Application No. 09/878,456

I CLAIM

[canceled][All following original claims in non-italics are deleted (redlined) and are replaced by Claims *in italics*].

1) [Canceled]

1)[*new*] *A portable artwork display means, comprising:*

a lightbox means; and

an artwork containment frame means, and

an artwork display platen means.

2) [canceled]

2) [*New*] *The portable artwork display means of Claim 1 is attachable into a display device;*

wherein:

the display device is a picture frame or any other such display device; and

attachment is temporary or permanent.

3) [canceled]

3) [*New*] *The lightbox means of Claim 1 is formed of a rigid heat-tolerant material configured and coated to diffuse reflected light inwardly.*

4) [canceled]

4) [*New*] *The lightbox means of Claim 3 is strengthened and augmented by means of rigid reflective panel secured onto back of lightbox.*

5) [canceled]

5) [New] *The lightbox means of Claim 4 is configured to prevent light exit from air vents.*

6) [New] *The lightbox means of Claim 5 is fitted with one or more adjustable light sources;*

comprising:

*commercial light sources of any category or number or combination; and
light sources opaquely coated full-length over half of circumference.*

7) [New] *The light sources of Claim 6 are timer-dimmable.*

8) [New] *An artwork display means, comprising:*

a light box means, and

an artwork containment frame means, and

an artwork display platen means.

9) [New] *The artwork containment frame means of Claim 8 is formed of rigid machineable material; comprising:*

one or more parts; and

internal light reactive/reflective coating; an

accommodation for one or more commercially-available light-diffusing screens; and

configured to receive platen means at viewer end.

10) [New] *An artwork display means, comprising:*

a lightbox means; and

an artwork containment frame means; and

an artwork display platen means.

11) [New] *The artwork display platen means of Claim 10 is formed of planar or non-planar rigid material.*

12) [New] *The artwork display platen means of Claim 11 is formed of transparently clear or translucent material.*

13) [New] *The artwork display platen means of Claim 12 is wholly or sectionally colored.*

- 14) *[New] The artwork display platen means of Claim 13 is formed of one or more similar or dissimilar parts.*
- 15) *[New] The artwork display platen means of Claim 14 displays artwork interchangeably secured at viewer side.*
- 16) *[New] The artwork display platen means of Claim 15 contains embedded artful arrays of inert of electrically conductive filamentary elements.*
- 17) *[New] The artwork display platen means of Claim 16 is formed of material reactive to light.*
- 18) *[New] The artwork display platen means of Claim 17 is itself an artwork with artwork applied directly onto either surface.*
- 19) *[New] The artwork display platen means of Claim 18 is preprinted with patterns and images to be completed by artist.*
